- 1. An airfield about 1,500 meters long and 600-700 meters wide is being constructed on the plateau between Podkilovac (probably Podkobljak)-Soboli-Zastenice (sic)-Jelenje. Nearby on height 281 is a round bunker with two heavy anti-aircraft guns. Smaller bunkers are also located behind Pothum near heights 395 and 449. Three additional bunkers for light anti-aircraft guns have been placed on the Kamenjak Mountain(heights 330, 471, and 497). Guns have not yet been installed in these bunkers, and they are not guarded. Three youth brigades are stationed in Jelenje, Pothum, Drazice and Zastenica (sic) for the purpose of doing construction work at the airfield and guarding fuel tanks hidden in camouflaged trenches. The youths live in tents and their superiors, five to six officers and engineers, are quartered at the parsonage at Jelenje.
- Another airfield is being completed between Podkobiljak, Lic, and Banovina together with barracks and a camp. Two large cargo planes, camouflaged, as well as several large gliders, were observed at this field.
- A glider and paratroop training school and a geophysical and weather station are to be constructed at the airbase in Lic.
- 4. Anti-aircraft bunkers for the Lic airfield are located near the path from Lic to Grizani south of the so-called "Pumpe" (height 738), north of Banovina (height 706), near the Maria Snezna chapel (height 738), and below Podkobiljak (height 1106). These bunkers are not yet completed. From all indications, they will be for light anti-aircraft guns.
